

**PROTOCOL TO IMPLEMENT
THE NINTH PACKAGE OF COMMITMENTS UNDER
THE ASEAN FRAMEWORK AGREEMENT ON SERVICES**

The Governments of Brunei Darussalam, the Kingdom of Cambodia, the Republic of Indonesia, Lao People's Democratic Republic, Malaysia, the Republic of the Union of Myanmar, the Republic of the Philippines, the Republic of Singapore, the Kingdom of Thailand and the Socialist Republic of Viet Nam, Member States of the Association of Southeast Asian Nations (ASEAN) (hereinafter collectively referred to as "Member States" or singularly as "Member State");

NOTING the ASEAN Framework Agreement on Services signed on 15 December 1995 in Bangkok, Thailand (hereinafter referred to as "AFAS"), which seeks to enhance cooperation in services amongst Member States, to eliminate substantially all restrictions to trade in services amongst Member States and to liberalise trade in services by expanding the depth and scope of liberalisation beyond those undertaken by Member States under the General Agreement on Trade in Services (hereinafter referred to as "GATS") of the World Trade Organisation (hereinafter referred to as "WTO");

HAVING carried out six rounds of negotiations and concluded eight packages of schedules of specific commitments embodied in the Protocol to Implement the Initial Package of Commitments under the ASEAN Framework Agreement on Services signed on 15 December 1997 in Kuala Lumpur, Malaysia; the Protocol to Implement the Second Package of Commitments under the ASEAN Framework Agreement on Services signed on 16 December 1998 in Ha Noi, Viet Nam; the Protocol to Implement the

Third Package of Commitments under the ASEAN Framework Agreement on Services signed on 31 December 2001; the Protocol to Implement the Fourth Package of Commitments under the ASEAN Framework Agreement on Services signed on 3 September 2004 in Jakarta, Indonesia; the Protocol to Implement the Fifth Package of Commitments under the ASEAN Framework Agreement on Services signed on 8 December 2006 in Cebu, the Philippines; the Protocol to Implement the Sixth Package of Commitments under the ASEAN Framework Agreement on Services signed on 19 November 2007 in Singapore; the Protocol to Implement the Seventh Package of Commitments under the ASEAN Framework Agreement on Services signed on 26 February 2009 in Cha-am, Thailand; and the Protocol to Implement the Eighth Package of Commitments under the ASEAN Framework Agreement on Services signed on 28 October 2010 in Ha Noi, Viet Nam;

NOTING the ASEAN Framework Agreement for the Integration of Priority Sectors together with the Roadmaps for the Integration of Priority Sectors signed by the ASEAN Leaders on 29 November 2004 in Vientiane, Lao PDR, the ASEAN Framework (Amendment) Agreement for the Integration of Priority Sectors signed by the ASEAN Economic Ministers on 8 December 2006 in Cebu, the Philippines, and the 2007 Protocol to Amend Article 3 of the ASEAN Framework (Amendment) Agreement for the Integration of Priority Sectors signed by the ASEAN Economic Ministers on 24 August 2007 in Makati City, the Philippines, which include four services sectors, namely, Air Travel, Healthcare, e-ASEAN (telecommunications and IT services) Tourism, and logistics services, provide measures to deepen and broaden internal economic integration and linkages, with the participation of the private sector, to realise an ASEAN Economic Community;

MINDFUL of the targets and timelines of the ASEAN Economic Community Blueprint adopted at the 13th ASEAN Summit held on 21 November 2007 in Singapore that,

amongst others, provided for the liberalisation of trade in services through consecutive rounds of liberalisation ending in 2015;

DESIRING to implement the Ninth Package of Commitments (hereinafter referred to as "Ninth Package") by the timelines specified;

HAVE AGREED AS FOLLOWS:

1. The Annexes to this Protocol shall consist of the consolidated schedules of each Member State's Schedules of Specific Commitments, Schedules of Horizontal Commitments, and the Lists of Most-Favoured Nation Exemptions, which shall form an integral part of this Protocol.

2. Subject to each Member State's Schedules of Specific Commitments and the Lists of Most-Favoured Nation Exemptions, Member States shall accord preferential treatment to one another on a Most-Favoured-Nation basis.

3. This Protocol and its Annexes shall form an integral part of the ASEAN Framework Agreement on Services.

4. This Protocol and the commitments set out in its Annexes shall enter into force one hundred and eighty (180) days after the date of signature. Member States undertake to complete their internal procedures for the entry into force of this Protocol and its Annexes. Each Member State shall, upon the completion of its internal procedures for the entry into force of this Protocol, notify the ASEAN Secretariat in writing. Where a Member State is unable to notify the completion of its internal procedures within one hundred and eighty (180) days of the date of signature, the rights and obligations of that Member State under this Protocol and its Annexes shall commence on the date on which the Member State notifies the completion of its internal procedures.

5. For a Member State that is unable to submit its full commitments under the Ninth Package by the time of signing of this Protocol:

- (a) commitments that are submitted thereafter but before the entry into force of this Protocol and its Annexes, shall also enter into force one hundred and eighty (180) days after the date of signature of this Protocol; and
- (b) commitments that are submitted after the entry into force of this Protocol and its Annexes shall enter into force upon their submission.

6. Pursuant to paragraph 5, a Member State that is unable to submit its full commitments under the Ninth Package by the time of the signing of this Protocol, shall notify the ASEAN Secretariat in writing of the commitments it subsequently submits towards the fulfilment of its full commitments under the Ninth Package. Such submissions shall form an integral part of the Member State's Schedules of Specific Commitments under this Protocol and its Annexes.

7. This Protocol shall be deposited with the Secretary-General of ASEAN who shall promptly furnish a certified copy thereof to each Member State. The Secretary-General of ASEAN shall also promptly furnish notifications made pursuant to paragraphs 4 and 5 to each Member State.

IN WITNESS WHEREOF, the undersigned, being duly authorised thereto by their respective Governments, have signed the Protocol to Implement the Ninth Package of Commitments under the ASEAN Framework Agreement on Services.

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that

(a) are exclusively or predominantly provided by a single or limited number of suppliers; and

(b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

(a) control over essential facilities; or

(b) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

(a) engaging in anti-competitive cross-subsidization;

(b) using information obtained from competitors with anti-competitive results; and

- (c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4 Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time or
- (b) after a reasonable period of time which has been made publicly known

to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and
- (b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

BRUNEI DARUSSALAM – LIST OF MFN EXEMPTIONS

For the 9th Package of Commitments under ASEAN Framework Agreement on Services

Sector or sub sector	Description of measure indicating its inconsistency with Article II	Countries to which the measure applies	Intended duration	Conditions creating the need for the exemption
All Sectors	Future liberalisation of measures affecting limitations on foreign equity or interest in companies established in Brunei Darussalam shall be carried out in a differentiated manner, and at the discretion of the relevant authorities.	All Countries	Indefinite	The measure would be applied in a differentiated manner to those investment that match Brunei Darussalam's specific development requirements with the abilities and facilities provided by foreign enterprises and their home countries. The objective is to maximise economic benefits of foreign participation in the Brunei Darussalam economy.
	Preferences for entry and temporary stay of workers from traditional sources of supply.	Traditional sources	Indefinite. Brunei Darussalam will periodically review this in the light of domestic and national policy considerations.	Due to the small population base the government needs to regulate the flow of foreign workers, both skilled and unskilled, to ensure social cohesion in Brunei Darussalam.
Legal Services	All measures pertaining to the provision of legal services in Brunei Darussalam.	All countries	Indefinite. Brunei Darussalam will keep the possibility of removing this exemption under review.	The exemption is necessary as the establishment of foreign law firms in Brunei Darussalam is based on case-by-case approval.

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that:

- (a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in relevant market for basic telecommunications services as a result of:

- (a) control over essential facilities; or
- (b) use of its position in the market.

1. Competitive safeguards

1.1. Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2. Safeguards

The anti-competitive practices referred to above shall include in particular:

- (a) engaging in anti-competitive cross-subsidization;
- (b) using information obtained from competitors with anti-competitive results; and
- (c) not making available to other services suppliers on timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1. This section applies to linking with suppliers, providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2. Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided:

- (a) under non-discriminatory terms, conditions (incl. technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (incl. technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3. Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4. Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5. Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time or
- (b) after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and
- (b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that

(a) are exclusively or predominantly provided by a single or limited number of suppliers; and

(b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

(a) control over essential facilities; or

(b) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

(a) engaging in anti-competitive cross-subsidization;

(b) using information obtained from competitors with anti-competitive results; and

(c)not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a)under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b)in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c)upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time or
- (b) after a reasonable period of time which has been made publicly known

to an independent domestic body, which may be a regulatory authority as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and
- (b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Regulatory Authority

The regulatory Authority is not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely and transparent manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

Philippine Reference Paper on Regulatory Principles in Telecommunications Services

The commitments in telecommunication services are in accordance with the General Agreement on Trade in Services and its Annex on Telecommunications. In support of market access commitments undertaken, the following principles will form the basis for the regulatory framework in basic telecommunications.

1. Competitive safeguard

Appropriate measures shall be maintained for the purpose of preventing suppliers from engaging in or continuing anti-competitive practices.

2. Interconnection

In order to achieve viable, efficient, reliable and universal telecommunications services, a fair and reasonable interconnection of facilities of authorised public network operators and other providers of telecommunications services shall be provided.

Interconnection shall be at any technically feasible point in the network, under non-discriminatory terms and conditions, in a timely fashion, and on terms and conditions that are fair, transparent and reasonable.

A service supplier requesting interconnection with another supplier will have recourse after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal Service

Universal service obligations, as may be defined by the appropriate Authority, shall be administered in a transparent, non-discriminatory and competitively neutral manner.

Authorised international gateway and mobile cellular telephone service providers are required by law to install a set number of local exchange lines in designated areas.

4. Public availability of licensing criteria

Where a license is required, the following shall be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a license;
- (b) the terms and conditions of individual licenses

The reasons for the denial of a license will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

The regulation of telecommunication suppliers shall rely principally on an administrative process that is stable, transparent and fair, giving due emphasis to technical, legal, economic and financial considerations, and with due regard to the observance of due process at all times.

A national consultative forum shall be maintained to allow interaction among the telecommunications industries, user groups, and academic and research institutions on important issues in the field of communications.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, which are frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

Notes to the Specific Commitments in the Sectors of Transport Services:

Maritime Transport Services

1. <<Maritime Agency Services>> means activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:
 - (a) marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies, acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;
 - (b) acting on behalf of the companies organising the call of the ship or taking over cargoes when required.
2. <<Pushing and towing services>> on the high seas and on coastal waters shall mean the business of pulling a vessel with the help of a watercraft/vessel, which is equipped with powerful engines and deck mounted winches to perform towing and pushing services. This is a service provided to ships, which are difficult to maneuver to berth or during bad weather conditions to assure their safety. These services are generally provided by vessels, which do not themselves carry freight or passengers.
3. <<Maritime cargo handling services>> means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:
 - the loading/discharging of cargo to/from ship;
 - the lashing/unlashing of cargo;
 - the reception/delivery and safekeeping of cargoes before shipment or after discharge
4. <<Port and waterway operation services>> shall mean the operation services of Ferry Terminals under the Road Roll-On/Roll-Off Terminal System (RRTS) of the Philippines' Strong Republic Nautical Highway (SRNH). The Guidelines on the Development, Construction, Management and Operation of Ferry Terminals under the Road Roll-on Roll-Off Terminal System (RRTS) is contained in Philippine Ports Authority (PPA) Administrative Order No. 03-2004.

Freight Forwarding Services

1. Notwithstanding the fact that road, rail, inland waterways and related auxiliary services are not fully covered in this schedule of specific commitments, a multimodal transport operator shall have the ability to rent or lease trucks, railway carriages or barges, and related equipment, for the purposes of inland forwarding of cargoes, or have access to, and use of, these forms of multimodal activities on reasonable and non-discriminatory terms and conditions for the purposes of carrying out multimodal transport operations.

Note¹ <<Multimodal transport operator>> means any person who on his own or behalf or through another person acting on his behalf concludes a multimodal transport contract and who acts as a principal, not as an agent or on behalf of the consignor or of the carriers participating in the multimodal transport operations, and who assumes responsibility for the performance of the contract.

Note² <<Reasonable and non-discriminatory terms and conditions>> means, for the purposes of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date.

1 Statutory Supervision Services With Accommodation for the Following
Types of Clients (CPC 9331):

- a) women and girls detained in a place of safety under Section 160 of the Women's Charter (CPC 93312);
- b) children detained in a place of safety under Section 8 of the Children & Young Persons (CYP) Act (CPC 93312);
- c) children and young persons detained in a place of detention under Section 44 (1) (f) CYP Act, or on probation to an approved school⁶ under Section 44 (1) (g) of the CYP Act (CPC 93319);
- d) children and young persons admitted to an approved home for statutory supervision under Section 49 (ii) of CYP Act (CPC 93312);
- e) persons placed on probation with the requirement of residence in an approved institution under Section 12 of the Probation of Offenders Act (CPC 93319).

2 Statutory Supervision Services Without Accommodation for the Following Types of Clients (9332):

- a) children and young persons placed under supervision of an appointed welfare officer under Section 49 (i) of the CYP Act (CPC 93329);
- b) persons placed on probation without the requirement of residence in an approved institution under Section 5 of the Probation of Offenders Act (CPC 93329).

⁶ The term 'approved school' used in Section 44(1) (g) of the CYP Act denotes a remand home for young offenders, and not a mainstream educational institution. Young offenders are detained in an 'approved school' for rehabilitation rather than for formal education.

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that

- (a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

- (a) control over essential facilities; or
- (b) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

- (a) engaging in anti-competitive cross-subsidization;
- (b) using information obtained from competitors with anti-competitive results; and

(c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4 Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time or
- (b) after a reasonable period of time which has been made publicly known

to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and
- (b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

Sector or sub sector	Description of measure indicating its inconsistency with Article II	Countries to which the measure applies	Intended duration	Conditions creating the need for the exemption
Computer reservation systems	Market access and national treatment are based on reciprocity in mutual concessions, but not necessarily in the same areas, as established under bilateral Air Services Agreements	All countries.	Indefinite Singapore will periodically review this in the light of international developments	Currently, the conditions and level of market access granted in air transport services are primarily governed by other multilateral agreements and/or bilateral air services agreements. In addition, the "Annex on Air Transport Services" contained in the GATS currently has only limited application to measures affecting the air transport services sector.
Maritime Transport Services: - Storage and warehousing - Freight forwarding - Inland trucking - Container station and depot services	The undertaking of the commitments to bind the current level of market access and treatment to services and services supplier, in the 4 sub sectors will be through the conclusion of bilateral shipping agreements	All countries.	Indefinite Singapore will periodically review this in the light of international developments	Some of Singapore's trading partners do not accord Singapore companies satisfactory access to maritime transport services in their territories

NOTE TO THE MARITIME TRANSPORT SCHEDULE

1. Where road, rail, inland waterways and related auxiliary services are not otherwise fully covered in this schedule, a multimodal transport operator shall have the ability to rent or lease trucks, railway carriages or barges, and related equipment, for the purpose of inland forwarding of cargoes, or have access to and use of these forms of multimodal activities on reasonable and non-discriminatory terms and conditions for the purpose of carrying out multimodal transport operations.
2. "Reasonable and non-discriminatory terms and conditions" means, for the purpose of multimodal transport operations, the ability of multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which enter the port at a later date.
3. Definitions:
 - 3.1 "cabotage": for the purpose of this schedule, means the transportation or towage of passengers or goods, between a port or place located in Thai waters and another port or place located in Thai waters.
 - 3.2 "Other forms of commercial presence for the supply of international maritime transport services": for the purpose of this schedule, means the ability for international maritime transport service suppliers of other members to undertake locally the following:
 - (a) Marketing and sales of maritime transport services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself;
 - (b) The procurement, on their own account of any transport and related services, necessary for the supply of the integrated service;

Definition

"Business Cooperation Contract" A Business Cooperation Contract is one of Foreign Investment Form in Vietnam, that is regulated by Investment Law in Vietnam and come into effect on 29 Nov. 2005

According to the Investment Law in Vietnam, "Business cooperation contract (hereinafter called BCC for short) means a form of investment signed between investors for business cooperation with profit-sharing or product-sharing, without creating a legal entity".

Article 9 of Decree No. 1082006/ND-CP dated 22/9/2006 providing guidelines of a number articles of Law on Investment says that :

1. In the case of investment in the form of a business co-operation contract signed between one or more foreign investors with one or more domestic investors (hereinafter referred to as *the co-operating parties*), the business co-operation contract must stipulate the interests and responsibilities of, and the sharing of business results as between each investor.
2. A business co-operation contract in the sector of prospecting, exploration for and mining petroleum and a number of other natural resources in the form of a product sharing contract shall be performed in accordance with relevant laws and the *Law on Investment*.
3. A business co-operation contract signed between domestic investors to conduct investment and business shall be in accordance with the law on economic contracts and relevant laws.
4. During the process of business, the co-operating parties may agree to establish a coordination board to perform the business co-operation contract. The functions, duties and powers of the co-ordination board shall be as agreed by the co-operating parties. The coordination board shall not be the leadership body of the co-operating parties.
5. The foreign co-operating party shall be permitted to establish an operating office in Vietnam to act as its representative during the performance of the business co-operation contract. The operating office of a foreign co-operating party shall have a seal, may open bank accounts, recruit employees, sign contracts and conduct all business activities within the scope of the rights and obligations stipulated in the Investment Certificate and business co-operation contract.

"Ship Broking Services" is the work of a shipbroker who undertakes for remuneration to act, on the individual authority of his principal, as an intermediary in concluding contracts of carriage, of marine insurance, of charter, of sale and purchase of vessel, towage contracts, recruitment agreement and contracts of other activities pertaining to maritime shipping activities"

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that

- (a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) cannot feasibly be economically or technically substituted in order to provide a service. A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:
 - (i) control over essential facilities; or
 - (ii) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

- (a) engaging in anti-competitive cross-subsidisation;
- (b) using information obtained from competitors with anti-competitive results; and
- (c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;

- (b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4 Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time; or
- (b) after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive per se, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence; and
- (b) the terms and conditions of individual licenses.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.
